INTRODUCTION

This report presents data on the migration status of the population 15 years and over by labour market activity. Table 21 gives the population 15 years and over classified by age groups and labour force activity, showing migration status and sex, for Canada, urban size groups, rural non-farm and rural farm, and provinces urban and rural in 1971. In Table 22 final figures are shown for the total and employed civilian migrants in the labour force by age groups and sex. These data are presented for the 1966 place of residence (provinces and selected sub-provincial areas) cross-classified by the 1971 place of residence (provinces and selected sub-provincial areas).

In the 1971 Census, labour force refers to non-inmates 15 years and over, who, in the week prior to enumeration, worked for pay or profit, helped without pay in a family business or farm, looked for work, were on temporary lay-off, or had jobs from which they were temporarily absent because of illness, vacation, strike, etc. Persons doing housework in their own home or volunteer work only, are excluded from the labour force. Also excluded are female farm workers who indicated that they helped without pay in a family farm or business for less than 20 hours. The civilian labour force excludes the Armed Forces identified as such in the census records. It should be noted that there are indications that the labour force counts for Quebec may be somewhat underestimated due to response problems. Further information regarding the labour force counts is available in the Population and Housing Research Memorandum (PH-EC-4) "Background Information on the 1971 Census Labour Force Data". This paper can be obtained on request from the Census User Inquiry Service.

The information in this report was collected on a 33 1/3% sample basis and excludes overseas households. As a result, the population for a given geographic area may differ from that shown in reports containing data collected on a 100% basis. The latter figures, of course, represent the official population counts (see Catalogue No. 92-715).

The 1971 Census figures in this report have been subjected to a confidentiality procedure to prevent the possibility of associating small figures with any identifiable individual. The particular technique used is known as "random rounding". Under this method, all last or "unit" digits in a table (including all totals) are randomly rounded (either up or down) to "0" or "5". This technique provides the strongest possible protection against direct, residual, or negative disclosures without adding any significant error to the census data. However, since totals are independently rounded they do not necessarily equal the sum of individual rounded figures in distributions. Also, minor differences can be expected for corresponding totals and cell values in various census reports.

DEFINITIONS

Age: Classifications are based on the number of completed years of age at last birthday prior to June 1, 1971.

Labour force activity: Refers to the labour market activity of persons 15 years and over in the week prior to enumeration, i.e., employed, unemployed or not in the labour force.

Employed labour force: Refers to all non-inmates 15 years and over, who, during the week prior to enumeration, worked for pay or profit, or in unpaid family work. It also includes persons who had a job from which they were temporarily absent, because of illness, vacation, strike, etc. (provided they were not also looking for work).

Unemployed labour force: The unemployed consists of all non-inmates 15 years and over, who, during the week prior to enumeration, were not working but were looking for work, or were on temporary lay-off, or would have been looking for work except that they were temporarily ill, or believed no suitable work was available in the community.

Ce bulletin présente des données concernant le statut migratoire de la population de 15 ans et plus selon l'activité sur le marché du travail. Le tableau 21 donne la population de 15 ans et plus selon le groupe d'âge et l'activité, par statut migratoire et sexe, pour le Canada, les régions urbaines par groupe de taille, les régions rurales non agricoles et rurales agricoles, et pour les provinces, les régions urbaines et les régions rurales en 1971. Le tableau 22 contient les chiffres définitifs en ce qui a trait à l'ensemble des migrants et aux migrants occupés faisant partie de la population active civile, selon le groupe d'âge et le sexe. Ces données sont présentées par lieu de résidence en 1966 (provinces et certaines régions infraprovinciales) avec recoupement par lieu de résidence en 1971 (provinces et certaines régions infraprovinciales).

Au recensement de 1971, la population active comprend les non-pensionnaires d'institution de 15 ans et plus qui, au cours de la semaine précédant le dénombrement, ont travaillé contre rémunération ou en vue d'un bénéfice ou sans rémunération dans une entreprise ou une ferme familiale, ont cherché du travail, étaient en congédiement temporaire ou avaient un emploi dont ils étaient temporairement absents à cause d'une maladie, de vacances, d'une grève, etc. Les personnes faisant seulement des travaux ménagers chez elles ou du travail bénévole sont exclues de la population active. Sont également exclues les travailleuses agricoles qui ont indiqué avoir travaillé moins de 20 heures sans rémunération dans une ferme ou une entreprise familiale. La population active civile ne comprend pas les membres des Forces armées désignées comme tels dans les documents du recensement. Il est à noter que, suivant certaines indications, la population active du Québec est peut-être quelque peu sous-estimée, en raison de certaines difficultés d'interprétation. On trouvera de plus amples renseignements concernant les chiffres de la population active dans une Note de recherche sur la population et le logement (PH-EC-4) intitulée "Étude des données du recensement de 1971 sur la population active". Cette note de recherche peut être obtenue sur demande au Service-utilisateurs du recensement.

Les renseignements de la présente publication ont été recueillis sur un échantillon de 33 1/3 % et ne tiennent pas compte des ménages outre-mer. Il s'ensuit que les chiffres de population pour une région géographique donnée ne sont pas forcément les mêmes que ceux des publications dont les données sont intégrales. Bien entendu, ce sont ces dernières données qui représentent les chiffres officiels de population (voir la publication n° 92-715 au catalogue).

Par souci de confidentialité, les chiffres du recensement de 1971 publiés ici ont été soumis à une formule qui interdit la possibilité d'associer des chiffres de faible importance à une personne reconnaissable. Cette technique particulière s'appelle l'"arrondissement aléatoire". Grâce à cette méthode, tous les derniers chiffres, c'est-à-dire les chiffres des unités (y compris tous les totaux) des tableaux sont arrondis de façon aléatoire (vers le haut ou vers le bas) à "0" ou à "5". Cette technique assure la protection maximale contre la divulgation directe, négative ou par recoupements, sans ajouter d'erreur significative aux données. Toutefois, puisque les totaux sont arrondis séparément, ils ne sont pas nécessairement égaux à la somme des chiffres individuels arrondis dans les distributions. De plus, il faut s'attendre que les totaux et les autres chiffres correspondants dans divers bulletins du recensement présentent quelques légères différences.

DÉFINITIONS

Âge: Nombre d'années révolues au dernier anniversaire avant le 1^{er} juin 1971.

Activité: Activité sur le marché du travail des personnes de 15 ans et plus au cours de la semaine précédant le dénombrement (occupées, en chômage ou inactives).

Population active occupée: Tous les non-pensionnaires d'institution de 15 ans et plus qui, au cours de la semaine précédant le dénombrement, ont travaillé contre rémunération ou en vue d'un bénéfice, ou sans rémunération dans une entreprise familiale, ou avaient un emploi dont ils étaient temporairement absents à cause d'une maladie, de vacances, d'une grève, etc. (pourvu qu'ils n'aient pas également cherché du travail).

Population active en chômage: Tous les non-pensionnaires d'institution de 15 ans et plus qui, au cours de la semaine précédant le dénombrement, ne travaillaient pas mais cherchaient du travail, ou étaient en congédiement temporaire, ou auraient cherché du travail s'ils n'avaient pas été temporairement malades, ou s'ils n'avaient pas été convaincus qu'il n'y avait pas de travail convenable disponible dans la localité.

DEFINITIONS – Concluded

Not in the labour force: Refers to all persons 15 years and over not classified as members of the labour force. Most persons in this category are students, housewives, retired workers, seasonal workers in an "off" season who are not looking for work, and persons who cannot work because of long-term physical or mental illness or disability, including inmates of institutions.

Migrant: A person who was residing in a different municipality five years prior to the census is classified as a "migrant". Canadian residents stationed abroad in the Armed Forces or the diplomatic services are excluded from all census tables dealing with internal migration.

It should be noted that such characteristics as age and labour-force activity refer to those which were reported at the time of the 1971 Census. Migration, however, could have occurred anytime in the five-year period prior to the 1971 Census.

Urban: Includes the population living in: (1) incorporated cities, towns and villages with a population of 1,000 or over; (2) unincorporated places of 1,000 or over having a population density of at least 1,000 per square mile; (3) the built-up fringes of (1) and (2) having a minimum population of 1,000 and a density of at least 1,000 per square mile.

Urban size groups: Municipalities classed as urban under (1) and (2) above are classified by size groups according to their population. However, all municipalities (or parts) lying within the urbanized core of census metropolitan areas or other census agglomerations are allocated to the size group of the whole urbanized core.

Rural: Includes all the remaining population.

Rural farm population: Includes the population living in dwellings situated on farms in rural areas. A farm, for census purposes, is an agricultural holding of one or more acres with sales of agricultural products of \$50 or more in the previous year. All persons living on such holdings in rural areas are classed as "rural-farm" regardless of their occupation. Thus, the population living on "census-farms" would include some persons not connected with farming operations and who derive their income from non-agricultural pursuits. Conversely, it would exclude those farm operators and their families who do not live on their farm holdings (e.g., in a neighbouring town or village).

Place of residence: The place where a person usually lived. Persons with no usual place of residence on Census Day were enumerated where found. These tables show place of residence on June 1, 1971 by place of residence on June 1, 1966.

Census Metropolitan Area (CMA): The main labour market of a continuous built-up area having 100,000 population or more.

For place of residence 1966, because of coding, adjustments had to be made to the geographic base of some CMA's: for Edmonton, Halifax and Vancouver, Indian Reserves are excluded as 1966 places of residence but are included in the 1971 place of residence data. For Sudbury, the unorganized territory is excluded as a 1966 place of residence but included as a 1971 place of residence.

The estimates of the mean square error for the characteristics covered in this report were not available at the time of publication. They will be available in the introductory report to this volume (Catalogue No. 92-741). Those users requiring this information prior to the release of the introductory report should contact the Census User Inquiry Service.

DÉFINITIONS – fin

Inactifs: Toutes les personnes de 15 ans et plus qui ne font pas partie de la population active. La plupart des personnes de cette catégorie sont des étudiants, des maîtres de maison, des retraités, des travailleurs saisonniers recensés en saison morte et ne cherchant pas de travail, ou des personnes qui ne peuvent travailler en raison d'une maladie ou d'une infirmité physique ou mentale de longue durée, y compris les pensionnaires d'institution.

Migrants: Les migrants sont les personnes dont le lieu de résidence cinq ans avant le recensement était en dehors de leur municipalité de résidence le jour du recensement. Les résidents du Canada membres des Forces armées ou du corps diplomatique en poste à l'étranger ne sont pas pris en compte dans les tableaux du recensement portant sur les migrations internes.

À remarquer que les caractéristiques telles que l'âge et l'activité sont celles déclarées au recensement de 1971. Par contre, les migrations ont pu se faire n'importe quand dans les cinq ans qui ont précédé le recensement.

Régions urbaines: La population des régions urbaines comprend la population des: 1) cités, villes et villages constitués de 1,000 habitants et plus; 2) localités non constituées de 1,000 habitants et plus ayant une densité de population d'au moins 1,000 habitants au mille carré; 3) banlieues bâties de 1) et 2) ayant une population minimum de 1,000 habitants et une densité d'au moins 1,000 habitants au mille carré.

Régions urbaines par groupe de taille: Les municipalités urbaines mentionnées en 1) et 2) ci-dessus sont classées selon le groupe de taille de leur population. Toutefois, toutes les municipalités (ou parties de municipalités) constituant le noyau urbanisé des régions métropolitaines de recensement ou des autres agglomérations de recensement sont classées dans le groupe de taille de l'ensemble du noyau urbanisé.

Régions rurales: La population des régions rurales comprend tout le reste de la population.

Population rurale agricole: La population rurale agricole comprend toutes les personnes occupant des logements de ferme situés dans des régions rurales. Aux fins du recensement, une ferme est une exploitation agricole d'une acre ou plus ayant vendu pour \$50 ou plus de produits agricoles l'année précédente. Toutes les personnes vivant dans une de ces exploitations situées dans une région rurale sont classées sous la rubrique "régions rurales agricoles", quelle que soit leur profession. La population des "fermes de recensement" comprend donc certaines personnes qui n'ont rien à voir avec l'exploitation agricole et qui tirent leur revenu de l'exercice d'activités non agricoles. En contrepartie, les exploitants agricoles et leur famille qui n'habitent pas leur exploitation agricole (par ex., ceux qui habitent une localité voisine) ne sont pas pris en compte.

Lieu de résidence: Endroit où le recensé vit normalement. Les personnes sans lieu de résidence habituelle le jour du recensement ont été recensées à l'endroit où elles se trouvaient. Ces tableaux indiquent le lieu de résidence au 1^{er} juin 1971 selon le lieu de résidence au 1^{er} juin 1966.

Région métropolitaine de recensement (R.M.R.): Principal marché du travail d'une zone bâtie en continu comptant 100,000 habitants et plus.

En raison du codage, il a fallu redresser la base géographique de certaines R.M.R. pour les lieux de résidence: pour Edmonton, Halifax et Vancouver, les réserves indiennes ne sont pas comptées comme lieux de résidence en 1966, mais elles le sont en 1971. Pour Sudbury, le territoire non municipalisé n'est pas compté comme lieu de résidence en 1966, mais il l'est en 1971.

Catalogue of reports

A catalogue is available which describes the individual reports in the Volume Series of 1971 Census publications as well as reports in other series (i.e., Advance Series, Census Tract Series, and Special Series). The catalogue also includes a price list and an order form. A copy of this catalogue may be obtained from Publications Distribution, Statistics Canada, Ottawa K1A 0T6. Other forms of publication

In addition to the tabulated results of the 1971 Census published in reports and bulletins, a large number of tables will be issued to users as copies of computer print-outs. These will also be available in microform. A variety of statistical tables may be purchased on computer "summary" tapes for further computer analysis by users. Details of the content, prices, and availability of census tabulations in these output media may be obtained from the User Inquiry Service, Census Field, Statistics Canada, Ottawa K1A 0T7.

Special tabulations

To the extent that confidentiality constraints permit, Statistics Canada will produce for users at cost, special tabulations not already included in the planned tabulation programme. Requests should be sent to the Census User Inquiry Service specifying clearly the precise classifications or cross-classifications and the geographic areas. The exact categories for each characteristic and a rough table layout should be included.

Maps and geographic files

Large-scale maps may be purchased to show the boundaries of enumeration areas (i.e., the territory covered by each Census Representative in taking the census), as well as small-scale maps of census divisions and other statistical areas. Supporting documentation relating to the census geographic files (i.e., place names, codes, etc.) are available in tabular form identifying the component enumeration areas of administrative and statistical units (e.g., towns, villages, municipalities, tracts). Further details, including costs to users, may be obtained from the User Inquiry Service of the Census Field of Statistics Canada.
